

Waste Management Consultancy Service

A full consultancy service can be provided including the preparation of waste management plans in accordance with local council development guidelines and planning instruments.

The waste management plan would incorporate the following items:

- Generated Waste Volumes
- Equipment and Waste Management Recommendations
- Waste Strategies, Options and Specifications

All of the recommendations in the report are in accordance with local authorities and reports can be prepared for any type of development from multi-unit residential, commercial, industrial and mixed-use type developments.

This service includes engineering assistance in the design of the waste facilities to compliment your development and all designs are undertaken using the latest design technology including AutoCAD.

Inclusive within this service, JD MacDonald will also attend any design and follow up meetings throughout the project's duration and this service is available throughout Australia.
