About JD MacDonald

JD MacDonald is a division of MacDonald Johnston Pty Ltd. As the market for washroom and hand drying equipment developed in Australia the JD MacDonald Division was formed. In 1959 the division expanded into washroom products including the distribution of imported electric hand dryers.

During 1985, the need for improved products was identified and JD MacDonald commenced the manufacture of electric hand dryers locally.

Significant product development has occurred since that time including the introduction of one of the world's first automatic hand dryers. This development has continued and the JD MacDonald Division offers a range of unique products designed in Australia with the emphasis being on appearance, functionality and long life.

Manufactured in Australia the JD MacDonald hand dryer range is locally supported and continues to evolve incorporating the latest in design and technology.

In 2008 JD MacDonald effectively launched their childcare equipment now offering up to 10 product variations. Also introduced in 2008 was their new premium residential washroom range to their already well established washroom accessories products.

JD MacDonald recently launched their new Select Classic range. Suited to the more sophisticated and stylish washroom, their streamlined appearance provides everything you need; including paper towel, hand dryer and waste disposal all in the one unit.

JD MacDonald is a leading manufacturer of linen and garbage chutes, static compaction equipment and a range of locally made stainless steel cabinets for commercial washroom applications.

Hand Dryers

JD MacDonald are leading designers and manufacturers of Australian made hand dryers. From high traffic commercial bathrooms to smaller executive washrooms or the hygienically driven healthcare and hospitality industries, JD MacDonald has a hand drying system to suit all applications.

Offering a range of Australian made hand dryers; Autobeam, Touchdry, Applause, Pronto and a variety of stainless steel units from the Select range.

All JD MacDonald hand dryers are manufactured in Australia and therefore parts, warranty and after sales service, if needed, are sourced locally.

Autobeam & Touchdry

Evolution favours innovation and JD MacDonald have achieved that with the Autobeam and Touchdry signature series hand dryers. Retaining all the strength and lasting characteristics we have come to rely on in an elegant design and finish. Incorporating strong appeal and functionality with improved air-flow, heat settings and lower noise, the combined result creates a comfortable experience for hand dryer users. Built with robust die-cast (anti-vandalism) aluminium casing and nozzle, both units are intuitive, have optional ergonomic sensor orientation or solid touch button and are purpose built for high traffic areas. These scratch resistant hand dryers minimise drying time and are engineered to ensure quality and reliability.

Autobeam and Touchdry models come with three nozzle finishes including silver gloss, satin and polished chrome. The Autobeam also comes as a full satin or polished chrome unit for that extra 'wow' factor.

Product Features:

Modern styling with optional chrome finish. Designer colours and choice of finishes are available for quantity purchases to suit any application. Optional swivel nozzle
Heavy duty cast aluminium cover creates vandal resistant and tamper-proof locking
High air volume and low heat velocity provides fast drying time
Large commercial fan and motor assembly creating rapid hand drying power and built for high traffic areas and heavy use
IPX3 Protection category. Protected against spraying water at a 60 degree angle from the vertical
Made in Australia and offering quality after sales service with spare parts available direct from the manufacturer
Compact and easy to install using template and brackets supplied

Applause

Silence is golden and the Applause hand dryer delivers fast hand drying without the noise often associated with a commercial hand dryer.

Compact in design, sleek lines, the Applause will suit any bathroom where good looks are paramount.

Available in classic white, satin stainless steel or a high polished finish, Applause can be selected for installation into the busiest bathroom with confidence.

Reliable, easy to install and whisper quiet are a few of the unique features captured within the Applause.

Product Features:

Polished or satin stainless steel cover suits all modern washroom designs providing an elegant feature and appearance
Aluminium cast cover is durable and vandal resistant
Slimline, discrete style and space efficient
Automatic operation ensuring limited skin contact therefore more hygienic
Reduced draw on power only 6.9A (amp) providing a cost efficient hand dryer
Large fan and small motor assembly making it whisper quiet
Made in Australia and offering quality after sales service with spare parts available direct from the manufacturer

Pronto

The Pronto hand drying system has been designed to deliver hygienically dry hands using a combination of a single sheet of paper and warm air from the one unit. The end result means that Pronto is gentler on hands, cuts down on paper waste reducing the cost of consumables, saves valuable time, and is whisper quiet.

Pronto's attractive white cover, is stain and scratch resistant and easily wipes clean.

A fast and efficient 'All-Australian Made' dual hand drying system can look after your hands, your business costs and the environment.

Product Features:

Combination of a paper towel dispenser with a hand dryer reduces the transfer of bacteria, offers the fastest hand drying system, and is gentle on skin and hands
7 second dry time ensuring a fast and gentle dry and reduces the occurrence of skin conditions such as dermatitis
Reduction in paper towel use reduces strain on the environment
High impact polycarbonate casing is durable with no sharp corners for easy cleaning
Opaque cover offering paper visibility
Compact access and use of both hand drying methods simultaneously
Made in Australia with quality after sales service and spare parts available direct from the manufacturer

Select Classic

The Select Classic range of cabinets offers you uninterrupted clean lines for any washroom design. Suited to the more sophisticated and stylish washroom, their streamlined appearance provides everything you need; including paper towel, hand dryer and waste disposal all in the one unit. Paper towel dispensers can be combined with large capacity bins. The addition of a fully automatic hand dryer will also offer the user options for drying methods and effortless convenience.

Select Classic products are made from high grade stainless steel, guaranteeing long life and durability.

Select Classic offers the flexibility of semi recessed or fully recessed installation and also a disabled compliant unit.

Product Features:

Versatile hand dryer combination for modern and sophisticated washrooms
Fully flush finish combined with an automatic angled airflow ensures external hand drying thus reducing the exposure and potential for bacteria
Featuring a sleek finish to achieve a contemporary, clean and minimalist appearance
Surfaces designed to be approachable, unobtrusive, soft flowing, hard wearing and easy to clean
3 in 1 combination, two convenient 2 in 1 combinations
Disabled unit is fully compliant in accordance with the Australian Disabled Standards 1428.1 and 1428.2
Single front door opening making it easy to reload paper towel, empty the waste bin and service the hand dryer
Low maintenance and serviceability, reduced ongoing operational costs and ease of use
Simple installation and easy wall adaptation through no additional structural changes required, including the disabled unit
Electrical supply entry from the top of the unit
Designed and manufactured in Australia offering service and parts readily available through local suppliers together with unsurpassed after sales support

Commercial Washroom Accessories

JD MacDonald can help you complete your vision with more than 1000 lines of commercial washroom accessories.

Designers can choose from three distinct ranges of accessories that include everything from paper towel dispensers, waste bins, soap dispensers, toilet roll holders, hooks, shelves, mirrors and everything in between.

Stock is available throughout Australia and JD MacDonald can even deliver special requirements to meet the most comprehensive specification.

Quality and function are paramount to withstand the demanding requirements of any commercial interior. JD MacDonald commercial washroom accessories are guaranteed to meet these requirements and provide the detail that is necessary in any good washroom design.

JD MacDonald offer solutions in commercial washroom settings and waste management.

Their range of accessories are seen everywhere around Australia, from shopping centres and corporate offices, through to nightclubs, restaurants and schools. The options are limitless – all you need is a little imagination.

Product Features:

Extensive product range allows specifiers to chose the right product for their project
Fully integrated selection of Recessed and Surface Mounted accessories provides seamless styling
High grade stainless steel that is durable, robust and suits modern bathroom design and ideal for all commercial applications
Simple installation ensures a quick and easy installation at a reduced cost
Keyed alike collections for ease of maintenance and consumable replenishment
Stocked locally with over 1000 commercial products for immediate delivery Australia wide makes specifying easy

Premium Residential Accessories

JD MacDonald is a leading distributor of commercial washroom equipment and has recently introduced premium residential washroom accessories to their already well established washroom range. Their washroom accessories are hygienic, safe and long lasting. Available in stainless steel and chrome plated brass finishes ensure durability, functionality and easy maintenance.

New to Australia and exclusive to JD MacDonald, the range is designed for many commercial applications, including hotels, apartments and aged care facilities.

Product Features:

Stainless steel or chrome plated brass finish combines commercial quality with residential design and is ideal for both commercial and residential washrooms
High end residential appeal is ideal for multi-storey fitouts
Latest design technology offering an elegant look with a touch of class
Compliments the commercial accessories offered by JD MacDonald
Stocked locally residential products for immediate delivery Australia wide makes specifying easy

Baby Change Stations & High Chairs

The JD MacDonald childcare range has been designed to fit seamlessly into modern commercial spaces whilst providing a suitable change station for all child changing needs. Offering baby change stations specifically tailored to accommodate all bathroom installations and applications focusing their design towards ensuring they fold away neatly, are presented in neutral finishes and are minimalist in appearance. Function, form, reliability and durability are also captured within their baby change station range without sacrificing the low profile and stylish look and finish. Each childcare piece is ergonomic, safe, hygienic and easy to operate and clean, offering creative yet suitable and supportive childcare products.

The polyethylene changers include wall mounted parallel and vertical. Stainless steel units are available as full or clad, recessed or surface mounted and some vertical options to consider.

In addition JD MacDonald has introduced an extended changer for older children and adults, available as recessed or surface mounted.

JD MacDonald has successfully added high chairs to complete their childcare range. Their range of space saving, stackable, ergonomic high chairs are made of high impact polyethylene, which resists odours and is very easy to clean. They are available in a range of colours to blend into the surrounding environment.

Product Features:

Modern design suiting low profile and uninterrupted clean lines and latest design technology
Product design that is durable, strong with effortless cleaning and maintenance
Vertical and parallel polyethylene models incorporate built in sanitary liner dispenser for consumer convenience and hygiene
Pneumatic gas struts for easy opening and closing. Light weight and easy to operate
One hand safety straps ensuring child is strapped securely, safely and easily
High chairs are sturdy, stackable and standard food service height ensuring ease of use and storage

Food Waste Disposers

WasteMaid food waste disposers are designed to effortlessly remove virtually any organic kitchen food waste, using the latest state-of-the-art features. Designed to save time, reduce smelly kitchen odours and eliminate food waste – environmentally friendly!

The JD MacDonald WasteMaid disposers are compact, quieter in operation and feature the Torque master advanced grinding system. There are no blades or knives making each unit extremely safe and easy to use.

Food waste disposers are environmentally friendly reducing the amount of waste that is sent to landfill. Meal preparation and clean up are easier and faster as food scraps are dropped directly into the disposer, ground into very small particles and washed away.

The WasteMaid models are easy to install and carry a lifetime warranty against corrosion (excluding Model 128).

Product Features:

Choice of 5 models offering options and versatility to suit any application
Permanent magnetic motor is more powerful, lighter, smaller and reaches full torque immediately, energy efficient
Bio Shield – built in anti-microbial agent keeps the kitchen odour-free and hygienic
Removable splash guard makes cleaning easier, prevents odours and is easily replaced
Speed Master mounting system ensures fast and easy installation and no special tools required
Operational switches are available offering wireless control or an air switch

Shower & Grab Rails

The JD MacDonald range is engineered to ensure they meet all Australian regulations and are disabled compliant. Providing a wider option for all project specifications with optional finishes and custom specifications that are competitively priced. Australian designed, manufactured and supplied offering quick delivery and a wider product range to meet all of your requirements.

Stainless steel in their construction that is robust and sturdy for both shower and washroom requirements.

Product Features:

Disabled compliant with Australian Standards. Suitable for disabled washrooms
High grade stainless steel construction provides a robust and durable product
Optional finish and custom made provide a wider range of options for project specifications
Quality finish, concealed fixings for all grab rails

Chutes

Every high-rise needs an efficient way to get laundry or garbage to the collection area. JD MacDonald with their exacting commitment to quality has the solution.

Chute intake doors are high quality stainless steel bottom or side hinged, hydraulically operated self closing and have a two hour fire rating.

A flushing unit can be fitted to the top of the chute to facilitate chute cleaning. Fire safety sprinklers can be installed into the chute intake where required to suit local authorities.

Garbage and linen chutes are vertical mounted and fitted with an inclined sliding door. Both discharge types are fitted with fusible links which allow doors to close in the event of a fire.

Product Features:

Manufactured from choice of material and diameters available in zincalume or stainless steel
Range of chute door sizes and chute diameters to suit various space requirements
Hassle free addition to multi-storey buildings offering an efficient method of managing waste. JD MacDonald take care of manufacture, installation and after sale service
Available with a range of accessories including fire sprinklers, flushing spray and sound insulation
Full range of acoustic options ensures the chute meets acoustic sound generation levels
Full range of cleaning options makes chute cleaning easier and restricts smells and odours
Choice of discharge with garbage and linen chutes available
Door face is stainless steel creating a quality appearance and ensuring easy cleaning
Stainless steel finish doors complete with hydraulic closer makes the door easy to open and close and eliminates generation of sound during process
All fire-rated doors have a 2 hour fire-rating which meets the BCA requirement for both linen and garbage chutes

Static Compaction Units

JD MacDonald Compactor range provides reliability, quality and engineered designs specifically tailored to suit customer requirements. Incorporating heavy duty components with a detailed design ensures long lasting equipment and customer satisfaction.

For collection and compaction of rubbish, JD MacDonald specifies the Rotobin 5000 for high density and residential applications. This cost effective, fully automated unit, specifically designed to fit under the garbage chute or loading dock, compacts rubbish into 'wheelie bins', for removal by hand to the collection area. As each bin fills, the compactor base automatically rotates positioning an empty bin under the chute.

For the collection and compaction of rubbish, JD MacDonald specifies the Macapak 2000 for commercial retail projects. The 2000 Series with a compaction ratio of 3:1, is ideal when the volume of waste exceeds 30m³ per week and uses container sizes of 19m³ to 45m³ capacity to suit either Hook or Roll-on Roll-off loading devices as used by the various cartage contractors. Ideal for refuse or recycling.

Product Features:

Heavy duty components and robust design ensuring a long-life and reliable operation
High quality hydraulic operation and componentry. Renowned quality and performance
Full PLC operation ensuring machine operation can be continuously updated as required
Range of compactors to suit different applications allowing machine sizes to vary depending on customer requirements
Engineering design is based on customer requirements and special designs can be accommodated based on the customer requirements

Disabled Equipment

JD MacDonald has effectively introduced a versatile range of products to cater and meet the requirements for a disabled washroom.

All disabled equipment is compliant with the Australian standards providing peace of mind and assurance that it is suitable and correctly manufactured.

All JD MacDonald disabled compliant products when installed must be in accordance with AS1428 to ensure the specified product is complying with all washroom specification requirements.

All JD MacDonald hand dryers are suitable for disabled washrooms with the recommended installation height of 1000mm. All other JD MacDonald products are clearly marked displaying a well recognised disabled logo indicating their suitability.

A broad range of products are available from the commercial and residential washroom equipment. Also offering shower and grab rails, shower seats and the specifically designed Select 3 in 1 incorporating a hand dryer, paper towel dispenser and waste bin all in the one unit.

JD MacDonald will continue to build on their range of disabled equipment and maintain all washroom requirements and standards within developing their range.

Consultancy & Specification Service

To assist you with your upcoming projects JD MacDonald welcomes the opportunity to provide a detailed and clearly outlined specification layout. This recently introduced service is dedicated to provide specification suggestions to suit your design brief and provide you with specification options to consider for each project.

Project Work

Provide JD MacDonald with the design parameters and we will assist you with a specification suggestion to suit.

Benefits:

- Local service and support from your local representative
- Be kept up to date with additions and improvements to our extensive range of products
(after all, we know our products better than anyone)
- Saves you valuable time
- Incorporates quality products you know and trust
- Presentation provided for you and your client
- Provided in convenient Microsoft Office format, enabling you to share or edit the document prior to presentation to your client if required
- Project pricing included and clearly outlined

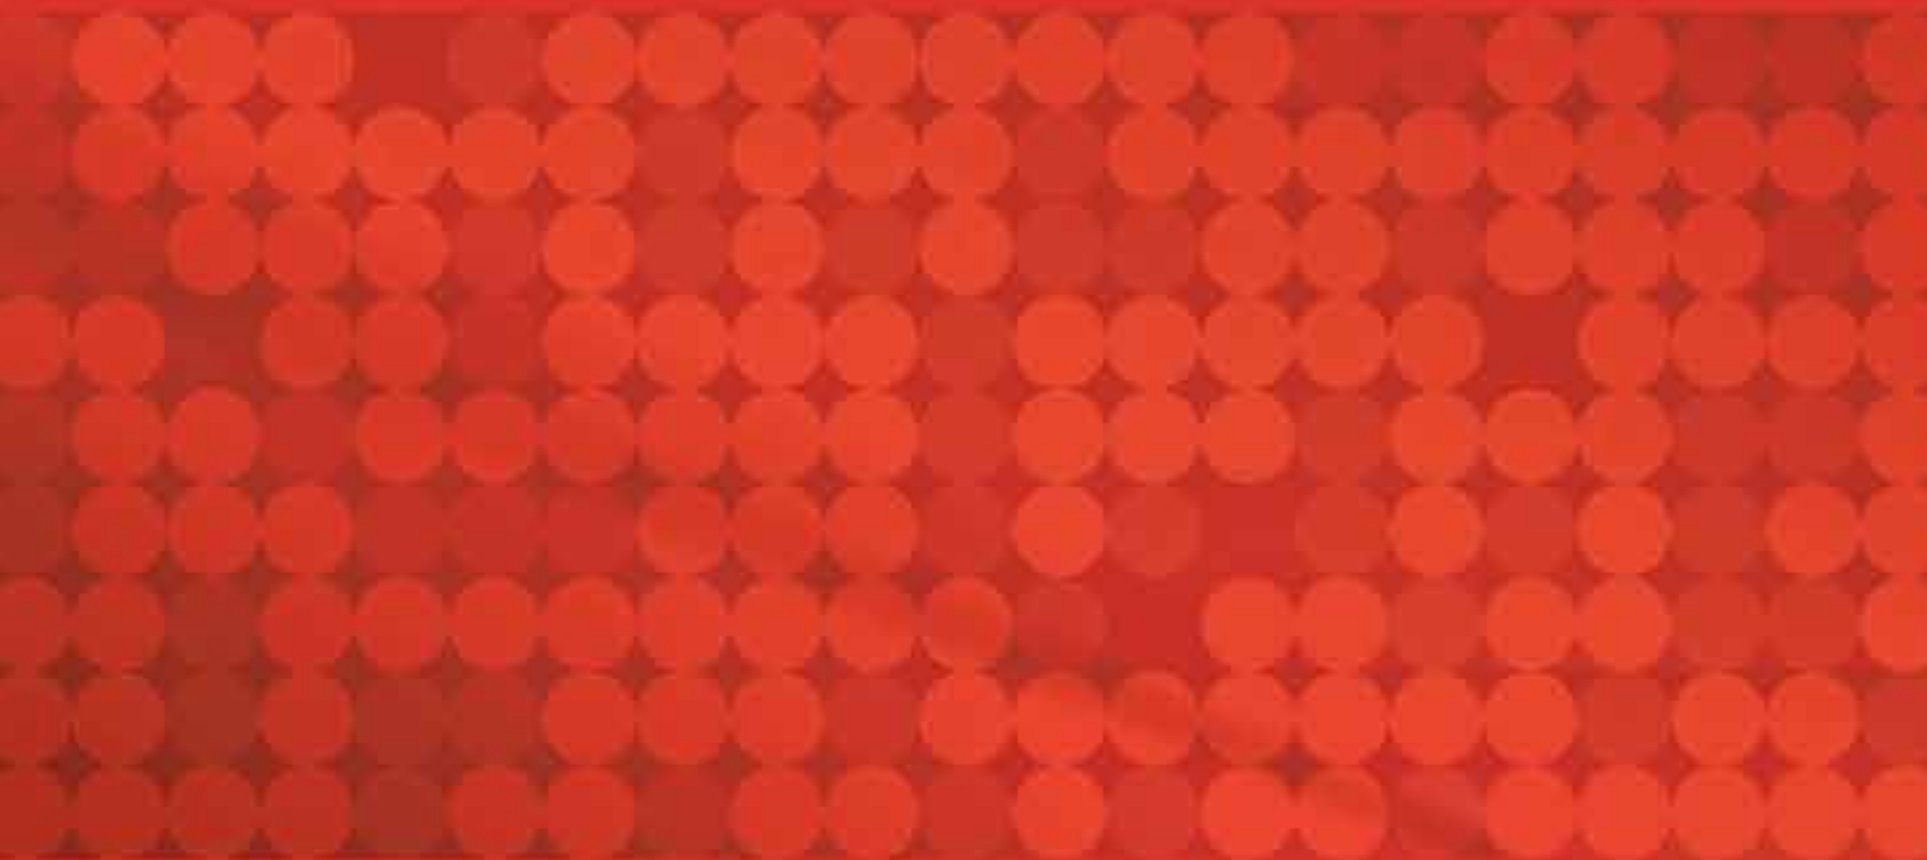

Refer to the Disabled Washroom Accessories layout for an example of the JD MacDonald Specification Service.
