

SPECIFICATION

Surface Mounted Soap Dispenser with Vertical Valve shall hold and dispense up to 1.18 litres of liquid soap, lotion or detergent. Dispenser shall be fabricated of alloy 18-8 stainless steel, grade 304, 20 gauge. All exposed surfaces shall be No. 4 satin finish. Valve shall be constructed of a chrome-plated brass body with stainless steel and plastic internal parts. A tamper resistant liquid level indicator shall be provided above valve.

INSTALLATION

Unit is surface mounted to wall or partition by means of a bracket (bracket & hardware provided). Unit is secured to interlocking wedge bracket and locked in place by means of a locking screw installed through tamper resistant refill cap. For mounting height standards refer to current Building Code of Australia for able bodied and/or disabled use.

OPERATION

Soap is manually dispensed by depressing push button. Unit is reloaded through tamper resistant refill cap at top. Soap tank will continue to feed properly until soap level falls below sight gauge. Tank supply is replenished manually on cycle determined by maintenance needs.

Surface Mounted Soap Dispenser with Vertical Valve shall be Model No. 0346 as supplied by JD MacDonald.
