

**Shown: Semi- Recessed Model No. 0458
Surface Mounted unit includes a trim**

SPECIFICATION

Surface Mounted Waste Bin shall have a waste capacity of 46 or 68 litres depending upon option chosen. Frame, waste container and cabinet shall be fabricated of alloy 18-8 stainless steel, grade 304, 22 gauge. Waste bin shall have hemmed edges for safety and shall be retained by a tumbler lock keyed alike to other JD MacDonald washroom equipment. Face trim shall be 25mm wide formed from one piece with no mitres, welding or open seams and have 6mm square return to wall. Structural assembly of all components shall be of welded construction. All exposed surfaces shall be No. 4 satin finish and be protected during shipment with a PVC film easily removable after installation.

INSTALLATION

Unit is surface mounted on wall recess using No. 10 self tapping screws (supplied by others) through concealed mounting holes provided. For mounting height standards refer to current Building Code of Australia for able bodied and/or disabled use. Unit shall be supplied with surface mounting collar to convert to surface mounting.

OPERATION

Waste bin is emptied manually on cycle determined by maintenance requirements. Keyed tumbler lock prevents unauthorized removal.

Surface Mounted Waste Bin shall be Model No. 0458-9 as supplied by JD MacDonald.

 All JD MacDonald disabled compliant products when installed must be in accordance with AS1428 to ensure the specified product is complying with all washroom specification requirements.
